*Clusters with more houses than indicated on the CoT map

[†]More houses were accessible; stopped surveying after target was reached (N=26)

[‡]Clusters that could not be surveyed because they were made up of vacant or undeveloped numbered stands

[§]Clusters that could not be surveyed because they were made up of gated communities or security complexes

[¶]Entry was refused at 245 houses, despite someone being at home

^{||}48 left at the crèche; 11 left at home as family was on vacation; 8 lost

*The drop-out rate was calculated using the number of children who received the previous vaccine series in the schedule as the denominator. It is the percentage of children who received the previous vaccination combination, who did not receive the next vaccination in the series.

OPV = oral poliovirus vaccine; BCG = Bacille Calmette-Guérin vaccine; RV = rotavirus vaccine; Penta = pentavalent vaccine (diphtheria, tetanus, acellular pertussis, inactivated poliovirus, *Haemophilus influenzae* type b); PCV = pneumococcal conjugate vaccine; HepB = hepatitis B vaccine; MV = measles vaccine.

Supplementary Table 3. Frequency distribution of reasons for missed vaccinations (N=59 children; 123 vaccinations)
